

Please come and visit our newly remodeled library!

The Crocker Library has had the original orange shag carpet from the 1960's replaced, the walls repainted and new ceiling tiles and lighting added. Many thanks to the Appearance Commission and especially to the chair, Linda Mooring for the year of planning it has taken to accomplish this renovation. There has been much "behind the scenes" work to make everything come together smoothly with minimal time for our library to have to close for the workers. Eartha Butler, our librarian always goes "over and beyond!" She is so helpful, kind, professional and caring to all our citizens! She has been present for all the work which has been opening and closing at all hours, moving EVERYTHING (books, bookshelves, computers, furniture, etc.) and coordinating all the workers.

Molly Westmoreland (Director of the Wilson County Public Library) and Genevieve Baillie (Extension Services Librarian) and Linda have spent many hours coordinating this project! Please check the message board for the library activities each month and stop by!

Here are some "before and after" pictures...
